DRAFT

Listing of Claims:

1-31. (canceled)

32. (currently amended) A flexible container for liquid cleanser comprising:

two flexible members forming a chamber therebetween for containing liquid cleanser, said flexible members have a modulus of elasticity conducive to liquid containment and gaseous inflation, said chamber containing liquid cleanser; and

a closure having a hollow cylinder having an open first end and an open second end and having a flexible base affixed to said open second end and to at least one of said flexible members for repetitive filling and expelling said liquid cleanser from said chamber in response to squeezing force selectively applied to at least one of said two flexible members; and

a stopper for ~~sealing~~ insertion into said open first end of said hollow cylinder.

33. (previously presented) The flexible container of Claim 32, further comprising:

a hanger for hanging said flexible container attached to one of said at least two flexible members or to the flexible sealing means; and

wherein said at least two flexible members are formed of vinyl material.

34. (previously presented) A bag for containing liquid cleanser, comprising:

a flexible bag body, said flexible bag body containing liquid cleanser;

a closure for fluid exchange in response to squeezing force applied thereto, said closure having a hollow cylinder having an open first end and an open second end and having a flexible base affixed to said bag body; and

a plug for sealing said open first end of said ~~flexible~~ closure.

35. (previously presented) The container of Claim 34, further including a hangar.

36. (previously presented) The container of Claim 32, further comprising at least one insert suspended in said liquid cleanser.

DRAFT

37. (currently amended) The container of Claim 36, wherein said at least one insert is of a predetermined size that prevents expulsion of said at least one insert from said flexible container via said ~~flexible~~ closure.

38. (canceled)

39. (canceled)

40. (previously presented) The container of Claim 34, further comprising at least one insert suspended in said liquid cleanser.

41. (previously presented) The container of Claim 40, wherein said at least one insert is of a predetermined size that prevents expulsion of said at least one insert from said flexible container via said closure.

42. (previously presented) The container of Claim 32, wherein said chamber contains a liquid emulsifier.

43. (previously presented) The container of Claim 32, wherein said at least two flexible members form a chamber therebetween having a recognizable shape according to a predetermined plan.

44. (previously presented) The container of Claim 43, wherein said recognizable shape is selected from the group consisting of animal designs, geometric shapes and flower designs.

45. (previously presented) The container of Claim 43, wherein said recognizable shape is of an animal design.

46. (previously presented) The container of Claim 43, wherein said recognizable shape is of a geometric shape.

DRAFT

47. (previously presented) The container of Claim 43, wherein said recognizable shape is of a flower design.

48. (previously presented) The container of Claim 32, wherein said second end of said closure is further defined as being sealed and extending into said chamber, and said closure further comprises a transfigurable slit disposed near said second end.

49. (previously presented) The bag of Claim 34, wherein said closure is a retractable valve cylinder, and wherein said second end of said closure is sealed, and wherein said closure further comprising a transfigurable slit formed in said retractable valve cylinder adjacent to said sealed end for fluid exchange in response to squeezing force applied thereto.

50. (previously presented) The container of Claim 32, wherein said chamber contains a liquid soap.

51. (previously presented) The container of Claim 32, wherein said liquid cleanser is selected from the group consisting of liquid soap, bubble bath, shampoo and conditioner.
